Grade 10.00 out of 10.00 (100%)

Question 1 Correct

Mark 1.00 out of 1.00

Given an array nums of size n, return the majority element.

The majority element is the element that appears more than [n / 2] times. You may assume that the majority element always exists in the array.

Example 1:

```
Input: nums = [3,2,3]
Output: 3
```

Example 2:

```
Input: nums = [2,2,1,1,1,2,2]
Output: 2
```

Constraints:

```
    n == nums.length
    1 <= n <= 5 * 10<sup>4</sup>
    -2<sup>31</sup> <= nums[i] <= 2<sup>31</sup> - 1
```

For example:

Input	Result
3 3 2 3	3
7 2 2 1 1 1 2 2	2

Answer: (penalty regime: 0 %)

```
#include <stdio.h>
#include <stdlib.h>
int Majority(int nums[], int size)

int count = 0;
int candidate = nums[0];
for (int i = 0; i < size; i++)</pre>
```

```
9
             if (count == 0)
10
11
                 candidate = nums[i];
12
              f (nums[i] == candidate)
13
14
15
                 count++;
16
             }
17
18
19
                 count--;
20
21
         }
22
         count = 0;
23
         for (int i = 0; i < size; i++)
24
25
             if (nums[i] == candidate)
26
27
                 count++;
28
             }
29
30
         if (count > size / 2)
31
32
            return candidate;
33
34
        return -1;
35
36
    int main()
37
38
         int n;
         scanf("%d", &n);
39
         int *nums = (int *)malloc(n * sizeof(int));
40
         if (nums == NULL)
41
42
         {
43
            return 1;
44
45
         for (int i = 0; i < n; i++)
46
         {
            scanf("%d", &nums[i]);
47
48
        int mElement = Majority(nums, n);
printf("%d\n", mElement);
49
50
51
         free(nums);
52
         return 0;
```

	Input	Expected	Got	
~	3 3 2 3	3	3	~

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
